Tapping The Power Of Personalized Learning: A Roadmap For School Leaders

Synopsis

In this powerful new book, James Rickabaugh, former superintendent and current director of the Institute for Personalized Learning (IPL), presents the groundbreaking results of the Institute's half-decade of research, development, and practice: a simple but powerful model for personalizing students' learning experiences by building their levels of commitment, ownership, and independence. Tried and rigorously tested in urban, suburban, and rural districts--and in different academic and economic settings--the IPL model has been proven to enhance student engagement and achievement at all levels. Rickabaugh provides principals and other top-level leaders with

- * Step-by-step guidance for implementing the model;
- * A detailed overview of the research and work behind the model's development;
- * A complete introduction to the heart of the model: a comprehensive, multi-layered framework centered on the three core components of learner profiles, customized learning paths, and proficiency-based progress;
- * Tools and activities for assessing and adjusting the model to meet the specific needs of students and staff;
- * Strategies for increasing and reinforcing enthusiasm for the change process among everyone involved, from the classroom to the greater community; and
- * An abundance of real-life examples and reflections from students, teachers, principals, and superintendents whose schools have flourished in record time and with minimal additional funding or resources.

Tapping the Power of Personalized Learning offers a blueprint that dramatically improves student outcomes and prepares today's learners to meet life's challenges in college and beyond.

Customer Reviews

This book is for any school leader who wants to truly transform the educational process and make it more meaningful and personal for every student. Jim Rickabaugh's thoughtful and very practical approach shows you how to use personalized learning to engage students, help them take ownership of their own learning and provides advice for teachers as co-designers of the learning process as well. is based on years of research at the Institute for Personalized Learning. This book provides the road map for the groundbreaking change our educational system desperately needs to keep students in school, and show them how to relate their learning to the future they want. As a former school administrator and teacher who has used personalized learning for years, I am certain that personalized learning is the vehicle to create the paradigm shift that our educational system needs to raise the bar and show all students that school and learning can be relevant to them today, and prepare them for any type of future that presents itself. Thank you Jim for such an extraordinarily practical and innovative book. It is one that is timeless and will benefit every educator, school leader and student!

A must read for anyone curious about personalized learning environments. Provides real world examples and real world data. It is applicable to any stakeholder in school communities. It is a new essential for all leaders looking to institute change.
