# Pediatric Bone And Soft Tissue Sarcomas (Pediatric Oncology)

## Synopsis

The purpose of this book is to integrate the most recent advances and support of my colleagues and friends in the diagnosis and treatment of pediatric bone and soft tissue sarcomas. The book is divided into two major sections, the first of which was performed at The University of Texas Southwestern Medical School, St. Jude Children's Research Hospital, and the second at Hospital for Sick Children in Toronto. In particular, I present salient concepts in epidemiology, the impact of novel tools in imaging and molecular biology, and the underlying principles for continued drug development. I would like to thank Drs. George Buchanan, Charles Pratt, William Crist, David Parham, Jim Anderson, and Larry Kun for their friendship, mentorship, and mentorship. In the second section, the book embarks on an exploration of wisdom. Their teachings will continue to be an excellent up-to-date survey of the diagnosis and treatment of less common diseases, with particular emphasis on the fact that this book will provide answers, guidance and need for an integrative, multidisciplinary approach hope to medical professionals, children, and their families. I am indebted to my colleagues and collaborators who have contributed their ideas, time, and knowledge to this project. I am also grateful for the contributions of Alberto Pappo, MD and Logan G. Spector, Julie A. Ross, Thomas D. Henry, Mary E. McCarville, and Rajaram Nagarajan.

## Book Information

Series: Pediatric Oncology

Hardcover: 240 pages

Publisher: Springer; 2006 edition (October 19, 2005)

Language: English

ISBN-10: 3540408436

ISBN-13: 978-3540408437

Product Dimensions: 7.8 x 0.7 x 9.8 inches

Shipping Weight: 1.9 pounds (View shipping rates and policies)
