Wells (professor emeritus, aviation, Embry-Riddle Aeronautical University) and Rodrigues (applied aviation science, Embry-Riddle Aeronautical University) have added new material on today's ground and air security concerns, changes in systems and regulations, and new maintenance and flight technologies to this fourth edition of a text for students, especially those with a limited background in the subject, enrolled in aviation safety and/or management programs and college or university flight programs. With the introduction of coauthor Rodrigues, the book broadens its field of study to include regulatory information on OSHA, EPA, and TSA. (Sci-Tech Book News 2004-06-01)
