Customer Reviews

My 25 year old son was diagnosed with diffuse systemic scleroderma. I turned to to find something to read about the disease, to educate me about what he would face given this diagnosis. I read a book written by a scleroderma patient who was severely ill with the disease and receiving the "conventional" treatments recommended by rheumatologists and promoted by the pharmaceutical industry. It was quite depressing to say the least. My son, being a knowledgeable biologist, refused such treatments. Thanks to , 6 weeks later, I received an e-mail suggesting that I may be interested in reading Scleroderma: The Proven Therapy that Can Save Your Life by Henry Scammell. Within days, I contacted representatives from the Roadback Foundation mentioned in the book, was given a physician's name to contact and my son began treatment with the antibiotic protocol. This is not a treatment you will see advertised in every magazine. It's been around and available for use for many years, it's safe, effective, inexpensive and it works for the vast majority of patients suffering and being needlessly debilitated from the diseases of not only Scleroderma, but Lupus and Rheumatoid Arthritis. Dr. Thomas McPherson Brown successfully treated thousands of patients and attempted to get the word out about this effective treatment for over 50 years, but as his patients'

recovery was "anecdotal" and not scientifically proven, it was not accepted by the scientific community. Why would you not try a treatment that bears little risk and works? To every parent and patient who has had one of these diagnoses handed to them, read this book, turn to people who can help and get your life back.
